SUMMARY

Cybersecurity graduate and CompTIA Security+ (SY0-701) certified aspiring SOC Analyst with hands-on experience through two Cyber Security Analyst internships, a SOC home lab, 100+ LetsDefend investigations, and security research. Experienced in security monitoring, alert triage, SIEM-based log analysis, phishing investigation, IOC extraction, incident documentation, and escalation using Splunk, Wazuh, IBM QRadar, Wireshark, Sysmon, and TheHive. Strong foundation in Windows Event Logs, DNS, HTTP, TCP/IP, MITRE ATT&CK, OWASP Top 10, and common attack techniques including phishing, malware, brute force, XSS, and DoS/DDoS. Comfortable following SOC playbooks and runbooks, documenting evidence, and supporting incident response under supervision.

PROFESSIONAL EXPERIENCE

VELTRIXIS TECHNOLOGIES PRIVATE LIMITED

Hyderabad

Cyber Security Analyst Intern (SOC)

Aug 2025 – May 2026

- Monitored security dashboards and reviewed 30+ security alerts per week using SIEM tools, analyzing Windows Event Logs and network traffic to identify suspicious activity and potential security incidents.
- Performed alert triage and initial investigation of phishing, brute-force, malware, DoS/DDoS, XSS, and policy-violation alerts by reviewing event details, source/destination information, timestamps, and indicators of compromise.
- Followed SOC playbooks and incident-response procedures to validate alerts, collect supporting evidence, document findings, and escalate confirmed or suspicious incidents to appropriate teams.
- Assisted with alert tuning, investigation workflows, and security documentation to improve triage consistency and reduce false-positive handling time.

RAMANA SOFT

Hyderabad

Cyber Security Analyst Intern (SOC)

Dec 2024 – May 2025

- Investigated 50+ security alerts involving phishing, suspicious authentication activity, malware indicators, and network-based threats.
- Performed phishing email analysis, IOC identification, Windows Event Log analysis, and network-traffic investigation to support security incident investigations.
- Assisted with incident response, remediation activities, and security documentation while maintaining clear investigation notes and evidence.

PALO ALTO NETWORKS – AICTE EDUSKILLS

Remote

Cybersecurity Virtual Intern (Virtual Internship Program)

Dec 2023 – Feb 2024

- Completed guided virtual labs on vulnerability assessment, basic penetration testing, firewall fundamentals, network security, and access control.

PROJECTS & HANDS-ON LABS

- MemorySOC – Hindsight AI SOC Investigation Engine**
Developed an AI-powered SOC investigation engine using FastAPI, Hindsight, PostgreSQL, and CICIDS2017 to analyze security events and retain investigation knowledge as persistent organizational memory. Implemented workflows for alert generation, historical context retrieval, and context-aware security investigation.
- SOC Home Lab – Threat Detection Environment**
Designed a security monitoring lab integrating pfSense firewall, Sysmon endpoint telemetry, and CrowdSec. Generated and analyzed attack simulations, investigated endpoint and network logs, extracted IOCs, and practiced detection and incident investigation workflows.
- Splunk SIEM – Security Log Analysis & Detection**
Built SPL queries to investigate DNS, SSH, and HTTP activity and detect brute-force attempts, suspicious DNS behavior, abnormal HTTP traffic, and potential indicators of compromise. Created dashboards to support security monitoring and SOC investigations.
- Hybrid CNN + LSTM IoT Intrusion Detection Model** – Built a Python deep-learning intrusion detection system for IoT attack classification; published at IEEE ACROSET 2026.
- LetsDefend – SOC Practice Platform** – Completed 100+ hands-on alert investigations covering phishing, malware, and web attacks through the SOC Analyst and SIEM Engineering paths.

TECHNICAL SKILLS

- SOC Operations:** Security Monitoring & Dashboards, Alert Review & Triage, Escalation, Incident Investigation, Playbooks & Runbooks, Investigation Documentation, Ticketing & Case Management (TheHive), IOC Extraction, Phishing Analysis, Malware Investigation, Containment & Remediation Steps, Threat Hunting
- SIEM & Security Tools:** Splunk (SPL), IBM QRadar, Wazuh, TheHive (SOAR), Wireshark, Nmap, Burp Suite, Nessus, Sysmon, Kali Linux
- Log Analysis:** Windows Event Logs, Authentication Logs, Web/HTTP Logs, DNS Logs, Sysmon Telemetry

- **Networking:** TCP/IP, DNS, HTTP, TLS, Common Ports, DHCP, Firewalls, VPNs, Network Troubleshooting, CCNA-level Networking Concepts
- **Security Frameworks & Fundamentals:** Common Attack Vectors (Phishing, Malware, Brute-Force, Privilege Escalation, MITM, SQL Injection), Authentication & Access Control Basics, MITRE ATT&CK, OWASP Top 10, ISO 27001, NIST CSF, Vulnerability Assessment, Endpoint Security, Cloud Security Fundamentals
- **Programming & Scripting:** Python (automation, log parsing, security tool integration), Bash (basic scripting), SQL, SPL
- **Operating Systems:** Windows, Linux, Kali Linux
- **Professional Skills:** Clear Communication, Technical Documentation, Curiosity & Analytical Thinking, Continuous Learning, Integrity & Discretion, Attention to Detail, Team Collaboration

EDUCATION

Institute of Aeronautical Engineering B.Tech in Computer Science and Engineering (Cyber Security) CGPA: 8.37	Oct 2022 – May 2026
Sri Chaitanya Junior College Intermediate (MPC) Percentage: 98.6	Jun 2019 – Apr 2021

CERTIFICATIONS

- CompTIA Security+ (SY0-701) – CompTIA
- Certified Cybersecurity Educator Professional (CCEP) – Red Team Leaders
- SOC Analyst Path – LetsDefend
- SIEM Engineering Path – LetsDefend
- Foundations of Cybersecurity – Google
- Introduction to Cybersecurity – Cisco Networking Academy
- Networking Fundamentals – Cisco Networking Academy

ACHIEVEMENTS

- **IEEE Conference Author** – “An Improved Hybrid Algorithm for Cyberattack Detection from IOT Environment,” IEEE ACROSET 2026.
- **Best Paper Award** – “AI Strategies for Sustainable Management and Practices” (ICCSCP 2024).
